EXPERIENCE

Software Engineer / Technical Delivery 03.2023 - 10.2026

tms - McDonald's Happy Meal Digital Team

- Delivered 9 web experiences for McDonald's Happy Meal campaigns, collectively reaching over 100 million views, featuring Nintendo, Disney, Marvel and Universal Pictures.
- Led technical delivery of small to mid-scale projects, coordinating requirements, resolving issues and preparing releases.
- Worked with Content, Motion, QA, Accessibility, Digital Production and Business Analysis teams to clarify requirements, validate assets and prepare development-ready deliverables.
- Investigated and resolved application, browser and device-specific issues across desktop and mobile platforms.
- Produced framework documentation and guidance to help Business Analysts and stakeholders understand system capabilities and plan new experiences.
- Refactored a core video-driven web game engine to improve performance, stability and maintainability.

Technical Consultant 07.2024 - 03.2026

Protegos / FAMA Film - contracts

- Worked directly with business owners at a Swiss insurance brokerage and an independent film production company to define website requirements and digital priorities.
- Designed and delivered multilingual websites, translating business goals into structured customer-facing pages and content.
- Served as the primary technical contact, providing support, investigating bug reports and resolving website issues.

Frontend Developer 01.2022 - 03.2023

Marotino

- Developed and tested reusable React components for the Menusso.com platform.
- Seconded by Speednet to the FICO redesign project, building frontend templates and resolving Drupal integration and browser issues.
- Managed development tasks, time estimates and delivery workflows in Jira.

Quality Assurance Engineer 06.2021 - 09.2021

Lionbridge Technologies

- Identified, documented and tracked defects, including critical issues and release blockers; reproduced issues and validated fixes through regression testing.
- Communicated test results and defect status to developers and stakeholders, including Sony and Media Molecule.
